

COOPERATION

IS KEY

TO ACCELERATE WIDE ADOPTION OF RENEWABLE ENERGY

HYDROGEN NOW

BALTIC SEA REGION HYDROGEN COUNCIL ENABLES COLLABORATION TOWARDS CARBON NET-ZERO

Through sharing knowledge, developing models and methods, the Baltic Sea Region Hydrogen Council contributes to increased competence, networking, long-term relationships, and cooperation between the Baltic-Sea region countries and other countries.

Responding to climate challenge

Building resilient solutions for energy production

The Baltic Sea Region Hydrogen council is set to facilitate and accelerate shared hydrogen economy to contribute to the overall objectives of the EU strategy for the Baltic Sea Region under the auspices of Swedish Institute.

The project intends to support the energy sector, industry and transports in bringing low carbon hydrogen solutions from niche to scale in Baltic Sea

Region and Ukraine in their efforts to seek energy security and carbon emission reduction.

Furthermore, the collaboration platform will investigate innovative methods for competence transfer from Baltic Sea Region countries to Ukraine. To support the reconstruction and accelerate the process of joining the European Community.

Funded by
SI. Swedish Institute

THE BALTIC SEA REGION HYDROGEN COUNCIL IS A COLLABORATIVE EFFORT INVOLVING EIGHT PARTNERS REPRESENTING EIGHT BALTIC SEA REGION COUNTRIES.
